

IVÁN SÁNCHEZ MARTÍNEZ

AI Program Management | Innovation Operating Models | Change Enablement & Stakeholder Management
Tlaxcala, Mexico · (+52) 246 127 1067 · ivsanchezmx@gmail.com · linkedin.com/in/ivsanchezm

PROFESSIONAL PROFILE

Innovation and AI strategy professional with over 8 years of experience designing and managing end-to-end operating models for innovation programs, leading cross-functional teams, and driving organizational adoption of new technologies. Proven track record in AI program and portfolio management, stakeholder engagement at executive level, and building enablement strategies that scale across multiple business units. Experienced in establishing governance structures, defining KPIs to track business impact, developing training and change management programs, and translating complex AI concepts into actionable business value. Combine strategic vision with disciplined execution in matrixed, multi-stakeholder environments.

PROFESSIONAL EXPERIENCE

Senior Consultant in Artificial Intelligence | FUNDES Feb 2026 – Present
Mexico

Lead for the development of a national AI Competency Standard for SMEs before CONOCER.

- Lead the design and validation of national standards for AI digital competency certification, translating complex AI concepts into structured, accessible frameworks.
- Oversee the integration of functional maps, performance criteria, and evaluation instruments, ensuring governance and methodological coherence across all deliverables.
- Develop enablement materials including item banks, evaluation guides, and evaluator manuals for scaled adoption.
- Act as liaison between the Competency Management Committee and sector experts, orchestrating cross-stakeholder collaboration for standards consolidation.

Sr. AI & Innovation Manager | Innogyzer – The AI Sprint Innovation Agency Jan 2025 – Present
Puebla, Mexico

- Develop diagnostics and strategic proposals for innovation and AI adoption across organizations.
- Support organizations in problem definition, strategic analysis, and data-driven decision-making.
- Leverage AI tools to support research, synthesis, and proposal generation for clients.

Lecturer in Entrepreneurship & Innovation | UPAEP Aug 2025 – Mar 2026
Puebla, Mexico

- Design and deliver university-level courses in innovation, strategic design, and value proposition formulation.
- Train future professionals in user-centered solution design and business model development.

Experimentation & Innovation Manager | Grupo Rotoplas May 2022 – Nov 2024
Mexico City, Mexico

Managerial role leading the innovation experimentation program across a multi-country, matrixed organization.

- Designed and managed the end-to-end operating model for the experimentation function, including standardized intake processes, selection criteria tied to business KPIs, and agile execution methodologies.
- Led a portfolio of 150+ experiments per year across multiple LATAM markets, coordinating cross-functional teams with clear roles, timelines, and robust measurement.
- Tracked and reported on business value realization, presenting executive-level results and recommendations that directly informed leadership investment decisions.
- Achieved an approximately 75% success rate on validated hypotheses and contributed to optimizing and avoiding investments exceeding \$20M MXN.

Innovation Processes & Methodologies Coordinator | Grupo Rotoplas Apr 2021 – Apr 2022
Mexico City, Mexico

- Designed and implemented the end-to-end corporate innovation management process, creating the governance structure, operational cadence, and visibility framework for regional initiatives.
- Established the innovation portfolio management system, defining intake criteria, prioritization tools, and transparent reporting for leadership.
- Led change enablement and training programs for over 1,500 employees, building innovation champions across the organization and fostering an innovation mindset.
- Drove a 20+ point improvement in internal customer satisfaction (NPS) for the innovation process through stakeholder management and continuous improvement.

- Analyzed technology and market trends as input for the corporate innovation strategy.
- Developed technology roadmaps and coordinated technology intelligence activities.
- Prepared strategic analyses and executive-level presentations for senior leadership.
